

# BIG DATA EUROPE

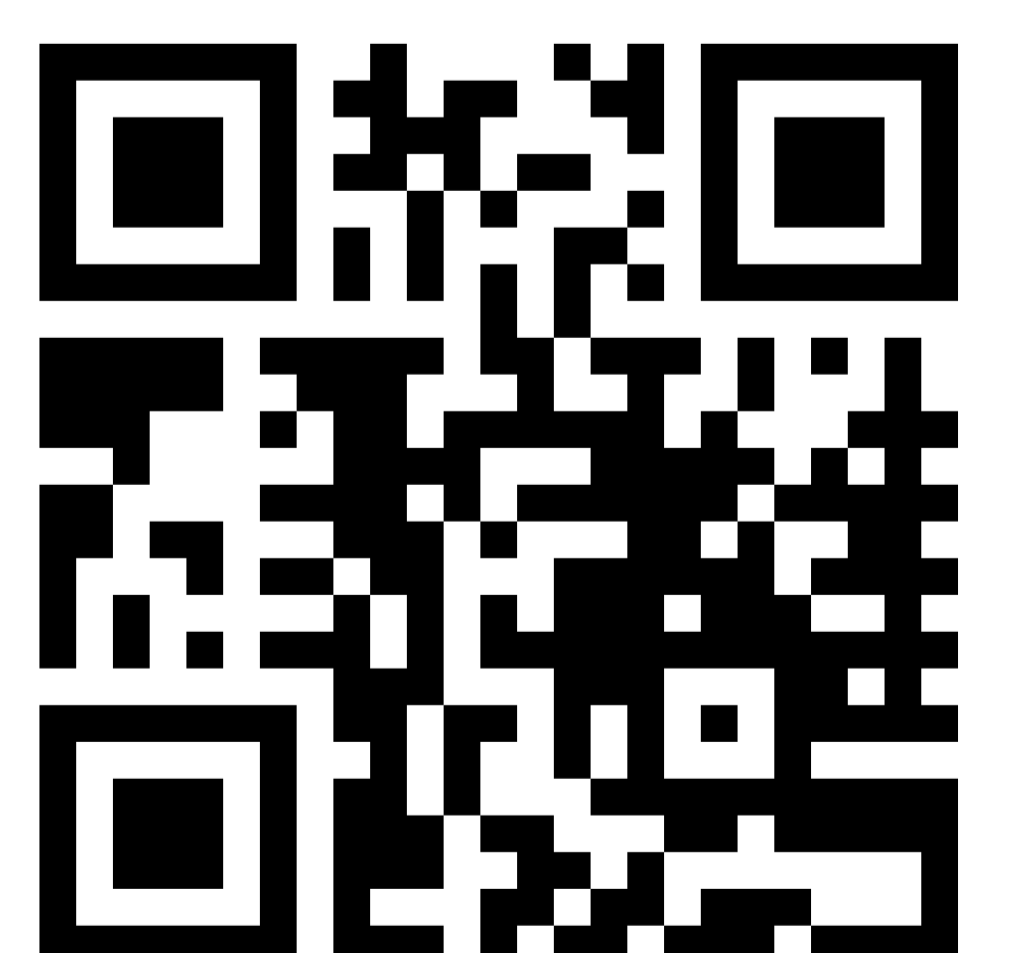

Empowering Communities with Data Technologies

## BIG DATA EUROPE

- aims to develop an adaptable Big Data Platform that is easy to deploy and use, allowing interested stakeholders to extend their Big Data solutions or introduce Big Data technology into their business processes.
- will build a network of stakeholders for key European societal sectors, to identify their particular needs in a series of Big Data workshops.
- will design, realize and evaluate a Big Data Aggregator infrastructure that meets the requirements of users from the societal key sectors, minimizes the disruption to current workflows, and maximizes the opportunities to take advantage of the latest European RTD developments.
